

AVIAGEN UK LTD

How a global poultry breeding company streamlined **Print Infrastructure** across multiple UK sites.

Industry

Agriculture & Poultry Breeding

Service

Managed Print

“

Workflo Solutions has provided outstanding service and consistent delivery across our UK sites. Their proactive approach and industry knowledge have enabled us to streamline our print operations while ensuring reliability for our teams.

Nigel Mayling, Group IT Director

Challenge

Aviagen required a reliable and scalable Managed Print Services provider to support multiple offices and farm locations across the UK.

With a growing operational footprint and complex document requirements, the organisation needed consistent print infrastructure, improved cost visibility and dependable support across all sites.

Managing devices across dispersed locations also required centralised monitoring and simplified supplier management to ensure efficiency and reliability.

Client Overview

Aviagen is a global poultry breeding company supplying day-old parent and grandparent stock to customers in more than 100 countries worldwide.

With a strong presence in the UK, the company supports poultry producers through advanced breeding programmes, research, and expert technical support, helping meet the growing global demand for sustainable poultry production.

Operating across head offices, regional sites, and farm locations, Aviagen requires reliable technology infrastructure to support administrative processes and operational workflows.

Solution

Workflo Solutions began supporting Aviagen in 2022, delivering tailored Managed Print Services across its UK operations.

As the partnership developed, additional devices and locations were incorporated into the solution, ensuring print infrastructure could scale alongside the organisation's operational needs.

1

Multi-Site Managed Print Deployment

Workflo deployed and continues to manage print devices across Aviagen's offices, regional locations, and farm environments, ensuring consistent performance across all sites.

2

Secure Print Management

For Aviagen Ltd, PaperCut print management software was implemented to provide secure printing, centralised control, and improved visibility over print usage.

3

Proactive Monitoring & Support

Continuous monitoring and proactive support ensure high device uptime and reliable performance, minimising operational disruption.

Results

Workflo's Managed Print Services have enabled Aviagen to operate with a consistent and centrally managed print infrastructure across its UK operations.

By consolidating services under a single provider and introducing secure print management tools, the organisation now benefits from improved reliability, greater cost visibility, and simplified administration.

The partnership continues to support Aviagen with scalable print solutions designed to evolve alongside the company's growth.

- Trusted technology partnership supporting multiple UK sites.
- Centralised print management across offices and farm locations.
- Improved operational efficiency with monitored device performance.
- Enhanced cost visibility and control through consolidated management.
- Reliable print infrastructure supporting daily operations.

Why Agriculture Businesses Choose Workflo?

Agriculture and food production organisations rely on reliable technology systems to support operations across offices, facilities, and remote sites. Workflo supports these businesses with an integrated suite of technology solutions spanning Cloud Infrastructure, Cybersecurity, AI-driven Business Automation, Managed IT, Document Management, and Managed Print; helping organisations operate more efficiently while maintaining secure infrastructure. Our experience supporting multi-site operational environments enables us to deliver scalable solutions that simplify technology management and improve reliability. With Workflo as a partner, organisations gain trusted infrastructure that supports both operational efficiency and future growth.
